

SQL for Data Science

Module 2: Installing and Configuring MySQL

Learning Objectives of this module

In this module you will learn about some of the basics of web architecture and setting up MySQL

- **Client Server Architecture**
- **MySQL Distributions**
- **Local Installations**
 - **Mac**
 - **Linux**
 - **Windows**
- **Licensing**
- **Accessing a Remote MySQL Server**
- **Graphical User Interfaces**

Client asks for a resource and the server provides it

Client Server Architecture

Client / Web Browser

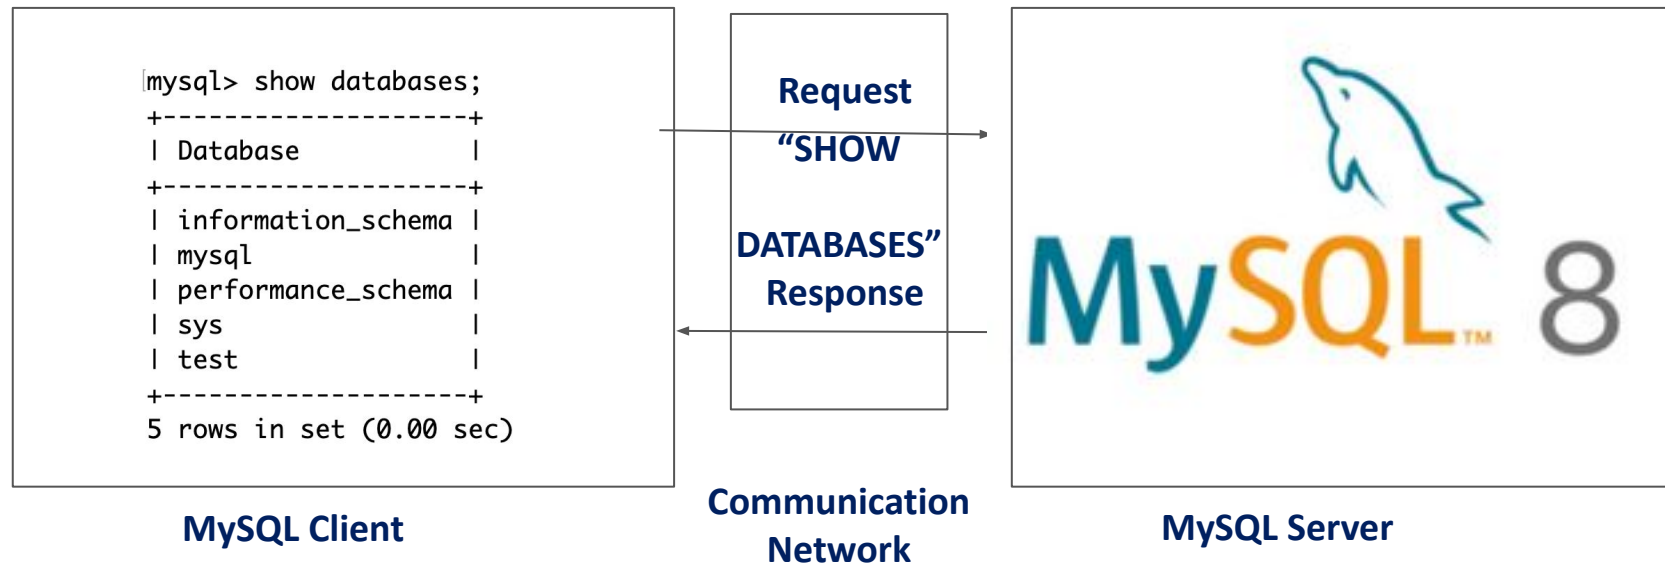

**Communication
Network**

Server

MySQL instance runs a server and the client accesses it

Client Server Architecture - MySQL

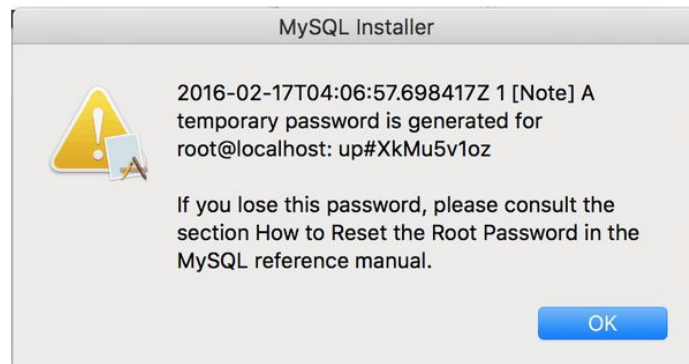

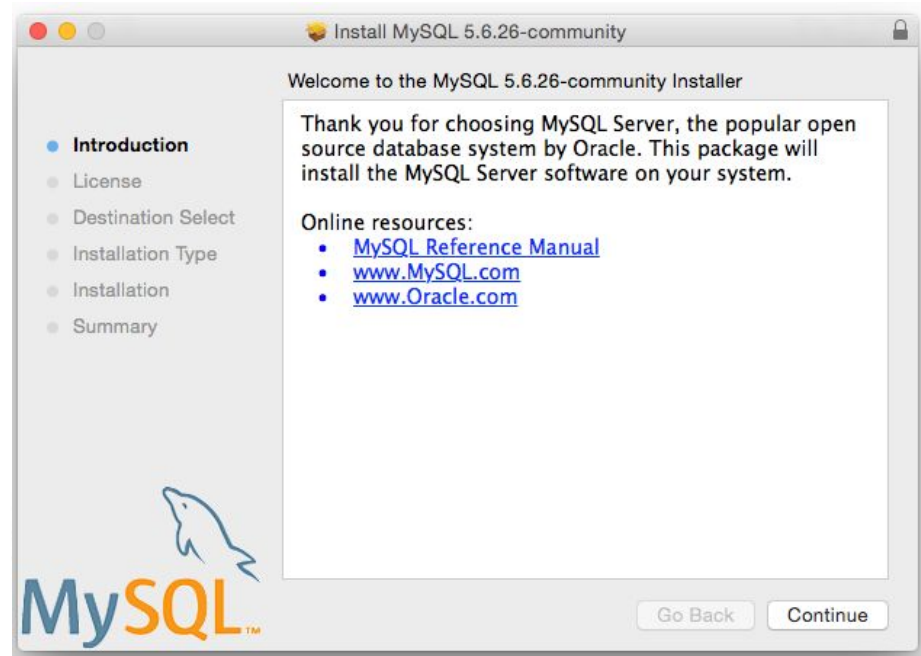

Knowing the distribution of MySQL/ MariaDB is essential in writing the correct queries

Distributions of MySQL/ MariaDB

<https://dev.mysql.com/doc/refman/5.6/en/osx-installation-pkg.html>

<https://dev.mysql.com/doc/refman/8.0/en/windows-installation.html>

Demo

Demo

Note that here we are talking about the licensing of Community Edition. There is also an Enterprise Edition of MySQL which comes with Support

License for commercial distribution

Free to use, share and modify

Need to Open Source changes

Remote MySQL server can be accessed by using the `-h` or `-host` option from command line

Demo

There are many GUI clients for MySQL. Using a GUI is a personal choice and we leave it to you to decide which one you like. We will be using the MySQL shell itself for this course so you understand the concepts well

Free Clients

- MySQL Workbench (Mac, Windows, Linux)
- Sequel Pro (Mac)
- phpMyAdmin (web app)
- Toad for MySQL (Windows)
- Free HeidiSQL (Windows)
- MySQL-Front (Windows)
- Neor Profile SQL (Mac, Windows, Linux)

Commercial Clients with Free Option

- DBVisualizer (Mac, Windows, Linux)
- TablePlus (Mac, Windows)
- dbForge Studio for MySQL (Windows)
- Valentina Studio (Mac, Windows, Linux, iOS)
- SQLPro for MySQL (macOS, iOS)
- SQLyog Community version (Windows)

Commercial Clients

- Navicat DB Admin Tool (Mac, Windows, Linux, iOS)
- Querious (Mac)
